

Company and Job Description Analysis

About CIH Bank

CIH Bank (Crédit Immobilier et Hôtelier) is one of Morocco's leading financial institutions, specializing in real estate and hospitality financing. Established as a major player in the Moroccan banking sector, CIH Bank has built a strong reputation for providing comprehensive banking services including corporate banking, retail banking, and specialized financing solutions. The bank is known for its commitment to digital transformation and cybersecurity excellence, making it a respected institution in Morocco's financial landscape.

Job Offer Summary

- **Position:** Cybersecurity Consultant (Fraud Entity)
- **Contract Type:** CDI (Permanent Contract)
- **Location:** Casablanca, Morocco
- **Department:** Fraud Monitoring and Reporting Entity

Key Responsibilities

- Monitor and identify new fraud risks related to existing and new products and processes
- Contribute to updating operational risk mapping focusing on fraud aspects
- Develop specific fraud risk mapping
- Update policies and procedures governing anti-fraud measures
- Conduct training and awareness sessions for staff
- Raise customer awareness about fraud prevention
- Prepare and consolidate fraud reports and participate in dedicated committees

Required Qualifications

- Master's degree (Bac+5) or equivalent
- Ability to handle sensitive information with discretion

- Strong writing and communication skills
- Analytical and synthesis capabilities
- Team collaboration skills to work with other departments
- Strong interpersonal skills
- Proactive, reactive, autonomous, and rigorous approach

Why I Match This Position

My profile aligns perfectly with this cybersecurity consultant role at CIH Bank for several key reasons:

- **Educational Background:** I am currently pursuing an Engineering degree in Cybersecurity & Digital Trust at ENSET Mohammedia, which directly matches the required Bac+5 qualification and provides specialized knowledge in cybersecurity frameworks.
- **Technical Expertise:** My hands-on experience with intrusion detection systems (Wazuh), threat classification using machine learning, and comprehensive cybersecurity certifications (Cisco CyberOps Associate, Huawei HCIA-Security) demonstrate my ability to identify and analyze security threats - a core requirement for fraud risk monitoring.
- **Practical Experience:** My internships have provided real-world experience in risk assessment, network analysis, and security infrastructure management, directly applicable to fraud risk mapping and policy development.
- **Communication Skills:** My experience in training and awareness activities, including participation in GITEX Africa 2025 and student representation roles, showcases my ability to conduct staff training and customer awareness sessions as required by the position.
- **Analytical Capabilities:** My projects in threat detection and classification, combined with my mathematical background, demonstrate the analytical and synthesis skills necessary for fraud pattern recognition and reporting.
